

Election Audits Message Test Poll

	ALL VOTERS	GOP	DEM	IND
1. After an election, many states conduct audits of the vote totals to verify the accuracy of the count, but they are not always required. Would you support or oppose requiring states to complete post-election audits after every election?				
Supportive	62%	76%	49%	61%
Opposed	22%	15%	29%	22%
Unsure	16%	10%	22%	17%
2. Would you be more or less likely to support post-election audits if you knew that it could help Americans trust that their elected officials were elected in the proper manner?				
More Likely	76%	83%	72%	72%
Less Likely	15%	14%	17%	14%
Unsure	9%	3%	11%	15%
3. Would you be more or less likely to support post-election audits if you knew that it could increase voter confidence in the accuracy of elections?				
More Likely	70%	75%	66%	69%
Less Likely	15%	15%	16%	15%
Unsure	15%	10%	18%	16%
4. Would you be more or less likely to support post-election audits if you knew that these audits have turned up count irregularities in the past, such as more votes being counted than there are actual registered voters?				
More Likely	63%	76%	50%	65%
Less Likely	19%	15%	23%	20%
Unsure	18%	9%	28%	15%

	ALL VOTERS	GOP	DEM	IND
5. Would you be more or less likely to support post-election audits of voter rolls if you knew that it could ensure voters are not mistakenly double registered?				
More Likely	58%	69%	52%	53%
Less Likely	21%	19%	23%	22%
Unsure	21%	12%	25%	25%

Results for this poll are based on automated telephone interviews conducted among a nationwide sample of 519 likely voters. Data for this survey research was collected by Cor Services, Inc.

Interviews were conducted via a computer-assisted telephone interviewing system utilizing techniques designed to achieve the highest possible respondent cooperation.

The surveys were conducted May 22–26, 2021. The margin of sampling error is plus or minus 4.30 percentage points. The margin of sampling error may be higher for certain subgroups. Results presented may not always appear to total 100 percent due to rounding.

Data was sampled using weighted demographic information from the U.S. Census Bureau's Current Population Survey Voting and Registration Supplement and the state election authorities. Demographic information for actual voters in past elections were used to construct sample target weights.

The Foundation for Government Accountability paid for all costs associated with this survey.
